

## “Give Your Old Clothes, One More Chance”

By : Peter Daggas, Pantelis Marneros, Dimitris Tsampartas

**U**nfortunately, not all clothes are recycled or properly disposed of in recycling bins, which leads to increased textile waste and environmental damage. In Cyprus, although systems for clothing recycling exist such as donation bins and collection programmes, many people are still unaware of them or do not use **them properly**. **Therefore**, we developed an idea that promotes clothing recycling while also raising public awareness. By sharing and disseminating our initiative, we aim to encourage **more responsible** behaviour and highlight the importance of reducing textile waste. **We** hope to contribute to a more sustainable future **and inspire our community**.

In Cyprus, clothing recycling systems exist, such as donation bins and collection programmes, but many people are still unaware of them or do not use them properly.

We Created Our Own Company Named ECHOLESS Which Recycles Old Clothe By Making Soundproof Panels.
